

4.4 分析測量數據

4.4.1 顯示圖表曲線(可設定 曲線圖的顏色、縮放記錄區間)

4.4.2 導出圖表或數據列表(可把記錄間隔中特定筆數另存檔案、或利用複製貼上到其它文件檔案內)

4.4.3 可將曲線圖或數據列經由檔案轉換 (轉換出 PDF、HTML、XLS 檔案)

The screenshot shows the Testo ComSoft Basic interface. The main window displays a line graph with two data series: temperature (°C) and relative humidity (%rH) over time. Below the graph is a data table with columns for ID, Date/Time, Temperature, and Humidity. On the right side, a '报告' (Report) menu is open, showing options for '选择报告' (Select Report) and '选择导出格式' (Select Export Format). The 'PDF' option is highlighted under the export format menu.

可選擇將曲線圖導出的類型

The screenshot shows the same Testo ComSoft Basic interface as above, but with a '另存新檔' (Save As) dialog box open. The dialog is set to save the file in the 'Program Files (x86) \ Testo' directory. The file name is '报告_图表' and the file type is 'XLS 文件 (*.xls)'. A red arrow points to the '存檔(S)' (Save) button.
